Introduction

A business, that is operating its business on a small scale level (in terms of capital, machinery and labour), can be called as a small scale business. More specifically, the small scale business is the part of an industry, which manufactures goods and services in terms of low scale. Small scale business play an important role for the development of Indian economy in many ways. About 60% to 70 % of the total innovations in India comes from the small scale business. Many of the big businesses today were all started small and then nurtured into big businesses.

The small scale business can earn lower revenue and profitability compared to the large firms since the investment is limited. Number of employees is also limited, hence, the owner of the small scale firm cannot expect for a large based of production for a certain period of time.

The small scale business can be covered/ expanded to a smaller markets.

The owner of the small scale firm can run the business either as a sole proprietorship or as a limited liability partnership.

Nilesh is presenting

Participants: Manasi, Vijay, Nilesh, chetan, 50 others.
